2026 APEC

HEALTHY WOMEN, HEALTHY ECONOMIES

RESEARCH PRIZE

2026 APEC HEALTHY WOMEN, HEALTHY ECONOMIES

RESEARCH PRIZE 2026 NOMINATION FORM

Deadline March 6, 2026

Background:

The Asia-Pacific Economic Cooperation (APEC) is a regional economic forum established in 1989 to leverage the growing interdependence of the Asia-Pacific. APEC's 21 members aim to create greater prosperity for the people of the region by promoting balanced, inclusive, sustainable, innovative and secure growth and by accelerating regional economic integration. Every year one of the 21 APEC Member Economies hosts APEC meetings and serves as the APEC Chair. Chile is the first APEC host economy to select "Women, SMEs and Inclusive Growth" as one of its APEC host year themes. On November 17, 2018 President Sebastián Piñera announced Chile's intention to inaugurate an "APEC Healthy Women, Healthy Economies Research Prize" in partnership with Merck¹.

Since 2014 the APEC "Healthy Women, Healthy Economies" (HWHE) initiative has been working on a public-private partnership basis across three APEC working groups - the Policy Partnership on Women and the Economy (PPWE), Health Working Group (HWG), and Human Resources Development Working Group (HRDWG) - to improve women's health so women can join, thrive, and rise in the workforce². Merck, as the primary HWHE private sector partner, co-chaired development of the [2015 HWHE Policy Toolkit](#), which details the issues, actions, and implementing elements for improving women's health across five pillars: workplace health and safety; health access and awareness; work-life balance; sexual and reproductive health; and gender-based violence.

HWHE has found that sex-disaggregated data and gender-based research and analysis is lacking. Policymakers, business leaders and others do not have adequate data and evidence to draw from to identify gender-specific interventions appropriate for their economies and organizations. To spotlight and spur much-needed data and evidence, **Chile, along with Merck's support, has created an annual prize recognizing research that enables policymakers, business leaders, and others to identify and implement measures to improve women's health in APEC economies so women can join and rise in the workforce.**

1 There are two different, unaffiliated companies that use the name Merck. The lead HWHE private sector partner is headquartered in Darmstadt, Germany, and is known as Merck everywhere in the world except in the United States and Canada where it goes by "Merck KGaA, Darmstadt, Germany" and also uses "EMD Serono" in biopharma. The other company, MSD, is headquartered in the United States. It is not affiliated with or related to Merck KGaA, Darmstadt, Germany. MSD is only known as Merck in the United States and Canada.

2 The APEC Policy Partnership on Women and the Economy, Health Working Group, and Human Resources Development Working Group have also endorsed the APEC Healthy Women, Healthy Economies Research Prize.

In order to be considered for this prize, individuals must submit an original piece of research that was published on or after January 1, 2024. All researchers from APEC economies are welcome to apply; you do not require a background in academia in order to be considered. However, the research must be evidence based. Furthermore, the research must be submitted in English. If the research was not originally written in English, please have it professionally translated. The winner of the prize will win USD \$20,000, while the 2 runners-up will win USD \$5,000 each. If the winner or runner up is from government then the prize money will be given instead to HealthyWomen (a women's health not-for-profit). Alternatively, the winner or runners-up may designate a not-for-profit entity to receive the prize money³. Please attribute the research to all involved in its making, but only one individual may be nominated and eligible to receive the prize money.

Methodology and use of evidence-based research

Given the need for evidence-based research to identify discrete policy recommendations for gender-based inclusive economic growth, it is crucial that sound methodologies are employed for any research used to draw conclusions concerning policy. As a result, any research under consideration should include a detailed explanation of the data collection process. Moreover, to the greatest extent possible, disaggregated data should be used to in order to support the researcher's exploration of the topic.
